

Fiery® XF for Intec workflow

Take your print capability, quality and performance to the next level with the Intec CP3000 Fiery XF print solution. Enhanced color control with improved print quality and greater workflow functionality are the cornerstones of the Fiery XF for Intec color management and workflow solution.

Complete with a state of the art workstation and custom built Intec RIP Pod, the system is provided with extensive default media set-ups, an intuitive user interface, imposition, spot and process color editing and layout adjustment features. The combination of the Fiery XF for Intec RIP and the CP3000 print engine creates a solution with the power and toolset to take any company beyond the boundaries of ordinary print.

Accurate color

The Intec Fiery RIP uses ISO color profiles for a 'true color' output, ensuring a truer color and high quality print result. For each Intec printer/toner/material combination a color profile must be generated, the Intec Fiery RIP provides a suite of default profiles for easy, straight out of the box printing ensuring optimal color control specific to the CP3000 printer range.

Sharper output

Text, logo's and vector images are sharper. The Fiery RIP interprets your text, EPS's, logo's and other vector data and translates this into edge-sharp vector data at the highest resolution using the scaling advantage of vector-based data.

Spot color control

Produce professional documents confidently in-house knowing that the colors of a company's brand or logo will print accurately and consistently every time. Enter specific color values for easy color matching, including PANTONE® color.

Tweaking color

Easily adjust color with simple to use sliders. Real time changes are displayed in the on-screen preview window prior to printing.

Create your own custom profiles

For the ultimate in color accuracy and where you use unique papers you can build your own color profiles. The ES2000 and Color Profiler options provide a convenient and easy way to build your own profiles.

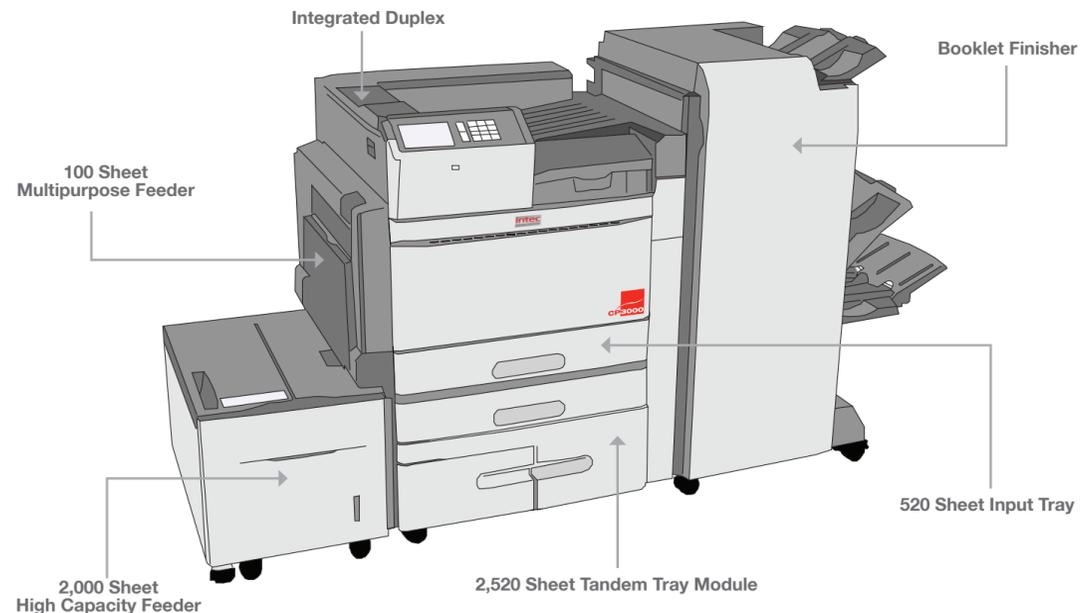

Lower running costs

Black toner is more cost effective than using all of the colors to create your black. The Intec Fiery RIP solution can reduce your running costs by providing an option to convert text and line art from composite (CMYK) black to true black thus allowing you to image with the more cost effective toner.

Multiple Language Support

For ease of use and flexibility, the Fiery RIP is available in 23 different languages.

PRINTING

The all-in-one print shop solution

Intec CP3000 color printer

Brilliant color at unbeatable cost

Setting new standards in print quality, value and media handling the Intec CP3000 produces glossy, vivid colors, rich, deep blacks and smooth color transitions whilst also providing the lowest cost per copy of any printer in it's class. Advertising agencies, graphic design shops, photography studios, marketing firms and many other businesses that demand high quality, low cost color output can keep more of their print jobs in-house thanks to the Intec CP3000 color printer's flexible finishing features, outstanding media handling, and unbeatable cost per copy.

“Lowest cost per copy in it's class!”

Further enhance your creative output

Whatever your requirements, the Intec CP3000 range has the printing solution to streamline your workflow. The high quality and great value cost per copy of the CP3000, combined with a multitude of professional finishing options means that you can tailor your system, to enable the production of all of your previously outsourced print jobs, in-house. Booklet creation, v-folding, hole punching, saddle stitching, collating, offset stacking and multi-position stapling are all supported, making the CP3000 a must have for any busy print department or marketing environment.

Oversize Output for Super Tabloid with bleed to long banner

Booklet

V-fold

2 or 3 hole punch

Multi-position stapling

A model to suit every need...

CP3100

The CP3100 is a compact floor-standing print solution enabling higher paper feeding capacity with the addition of the Intec 520 Input Drawer Stand. Featuring the outstanding capability of the Intec CP3000 print engine, the CP3100 is able to print onto a range of media substrates up to 150 lb. Cover, in sizes ranging from 4.1" x 5.8" to Tabloid Extra and long banner lengths. This high volume printing solution is the perfect addition to any print, office and marketing environment.

CP3200

Expand your creative output with the Intec CP3200. The inclusion of the Intec Standard Finisher and 520 Drawer Stand allows the effortless creation of high volume, stapled or hole punched documents. The 520 Drawer Stand supports a multitude of media options from 6" x 9" up to Super Tabloid. Glossy paper may be used in the upper bin which supports up to 500 sheets of media, while the lower bin can hold up to 3,000 sheets of 16 lb. Bond to 58 lb. Cover paper in a range of sizes. 4 position stapling (5,000 staples capacity) of up to 50 sheets of media, Letter 2 or 3 hole punching of up to 47 lb. Cover media and offset stacking up to 0.6" is also supported.

CP3300

Create outstanding booklets and documents with the CP3300 booklet finishing system. The Intec Booklet Finisher builds on the great features of the Standard Finisher by enabling the production of 60 page booklets. Not only can the Intec Booklet Finisher fold, staple, saddle stitch, hole punch, collate and offset stack it can also automatically select and add different media as a cover page to create high quality finished booklets.

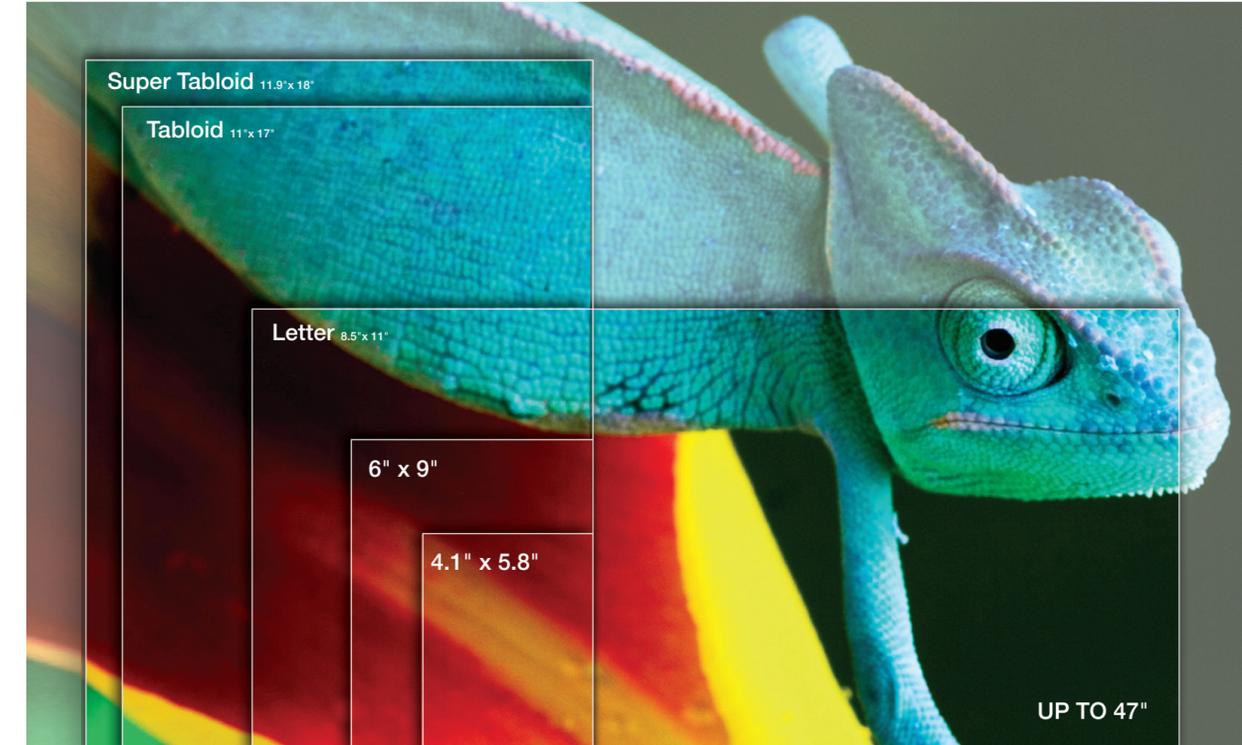

CP3400

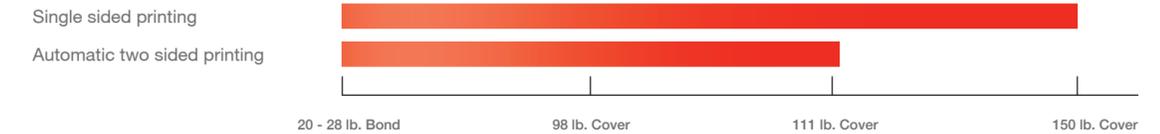

The CP3400 system ensures you have the largest media capacity and fully specified finishing options available from the CP3000 range. The combination of the Intec Booklet Finisher, Intec 2,520 sheet Tandem Tray Module and the Intec 2,000 sheet High Capacity Feeder makes the CP3400 the ideal solution for high volume print production. Booklets, point of sale, marketing materials and many other previously outsourced print jobs can now be produced in-house with this fully featured printing press. The ultimate solution for all your print requirements!

Amazing media handling

With the CP3000 color printer range your creative options are virtually limitless. Thanks to amazing media handling capabilities and multi-substrate printing technology, you can produce superb quality output on 20 - 28 lb. Bond to 150 lb. Cover media, in sizes ranging from 4.1" x 5.8" to 47" banner stock. From customer ready brochures and sales materials, to posters, banners, booklets and business cards, the CP3000 is truly in a class of its own when it comes to finishing, quality and unbeatable cost per copy.

Media weight capabilities

Consistent color, everytime

Produce professional documents confidently in-house knowing that the named colors of your company's brand and logo will print accurately and consistently every time. Through Intec Named Color Replacement, included as standard with your device, users can enter specific color values for easy color matching, including PANTONE® Color and colors in the DIC Color Guide.
